D'NOTIFIER

D'PROS **D'NOTIFIER** is a comprehensive notification and alert system that supports your company's business rules and critical processes. **D'NOTIFIER** supports all critical business functions, promoting business continuity and network up-time. It allows company managers to stay on top of their well-run business 24x7x365, regardless of the time or their location worldwide.

D'NOTIFIER enables you to efficiently manage the automation and customization of every possible critical alert. Customized alerts with predefined conditions for critical situations are set up quickly and easily, optimized for specific company rules and policies. Any breach of these policies is constantly monitored, while the relevant users are notified instantly. As a result, the costs incurred are significantly decreased, as the response time is reduced to a minimum, lowering TCO.

D'NOTIFIER fast user adoption and daily use by both business and IT users ensures business continuity.

D'NOTIFIER @YOUR Service

In a perfect world, your entire IT system and all business processes work smoothly. But just in case, your alert system is defined and configured to tackle business-critical situations as they arise. In the real world, critical situations arise on a daily basis. This is when you have to respond immediately to real-time alerts.

- Do you know exactly what happened, when and where?
- Were you notified according to your preset criteria?
- Are you able to constantly monitor your entire network?
- Can you set alarm thresholds over time?
- Can you set operational modes and associate events accordingly?
- Can you easily configure alarms and notify relevant personnel by email/text message?

In your busy and complex daily business environment, you can rest assured that **D'NOTIFIER** will actively deliver the mission-critical information you need for rapid crisis resolution. It will support you as you effectively manage and solve critical situations.

SAP® Certified
Powered by SAP NetWeaver®
